# Farms are changing and Equipment Breakdown coverage is critical.

---

To produce more crops with fewer acres and employees, today's farmers rely more than ever on sophisticated technology that's essential to their day-to-day operations. This innovative equipment is embedded with electronic components, increasing its susceptibility to loss and the need for specialized, expensive repairs.

# The technology that matters most.

---

This is just some of the critical equipment that our Equipment Breakdown coverage protects:

- **Alarm systems**
- **Automatic waterers**
- **Computerized feeding systems**
- **Cooling systems**
- **Generator sets**
- **GPS systems**
- **Milking parlors**
- **Process machinery**
- **Refrigeration units**
- **Sensors**
- **Transformers**
- **Well/water pumps**

## Affordable, comprehensive coverage.

---

Our Equipment Breakdown coverage can fit seamlessly and affordably into your policyholder's portfolio. Choose from many additional coverages such as livestock, poultry and spoilage to create comprehensive protection for your policyholder's unique needs.

# Responsive, collaborative partnership.

---

Our dedicated team offers both highly specialized expertise and a genuine collaborative spirit. You'll find us to be flexible and efficient at every stage of a claim, from initial assessment to quick and fair claims settlement. We frequently address some of the most critical farm losses.

## Electronic equipment

---

Power surge damage is the leading cause of equipment breakdown loss and can affect multiple pieces of equipment, regardless of age. As electronic equipment becomes more commonplace, the number of potential losses can increase.

## Well pumps

---

Most farm operations need a water supply for irrigation and livestock. Equipment breakdown damage to well pumps can impact both.

## Generator sets

---

When electrical power supply is interrupted, farmers rely on generators to keep operations running. If a generator breaks down, the farm is without power and can suffer livestock and production losses, as well as spoilage.

## More than coverage. Loss prevention.

To us, helping prevent loss is also part of the job. Mutual Boiler Re offers your policyholders useful loss prevention materials, including hazard guidelines for everything from hog confinement to dairy farms. That's just part of the value we add because that's what partners do.
